

16. Pilots must use timesharing techniques to effectively divide their attention inside and outside the flight deck. Define the concept "see and avoid."

---

---

---

---

---

17. Draw the 25NM radius from DWH on your sectional and terminal charts. Identify landmarks which you could use to remain within your student pilot solo range and clear of Class B airspace.

---

---

---

11. How do you enter and exit the traffic pattern at an uncontrolled field? What radio communications are recommended?

---

---

---

---

---

12. How can you determine if a runway is closed?

---

---

---

13. What is the importance of hold lines? When can you cross them? Diagram the hold lines you would encounter before entering and exiting a runway.

---

---

---

---

---

---

---

14. After landing, and when not instructed by ATIS, when can you exit the runway?

---

---

---

---

15. There are several ways pilots can lower the risk of being involved in a runway excursion. List some ways that you as a student pilot can avoid a runway excursion.
