

Activity 1.1.2 - Safe Password Poster

Instructions

Part 1: Creating your password

1. Select a phrase that has at least 6 words in it
 - if it has a number in the phrase, that will make this easier

Example: three blind mice see how they run
2. Take the first letter of each word in the phrase:
Example: tbmshtr
3. Take any numbers and turn them into numerals:
Example: 3bmshtR
4. Make two of the letters upper case:
Example: 3bMshtR
5. If you don't have a number, add it to the beginning. If you do have a number, add a special character to the beginning.
Example: [3bMshtR
6. Now add a colon or = at the end
Example: [3bMshtR=
7. This will be your base password. Now for every website where you register, you will add 3 or 4 identifying letters to your password.
Example: [3bMshtR=FBK
[3bMshtR=AMZ
[3bMshtR=TWT
[3bMshtR=INST

Part 2: Creating your Poster

Before you start, use pencil to sketch this out - you are being graded on a strong password AND an attractive poster.

The poster must include:

- a. Your original phrase
- b. Two examples of your password that will be used on two different websites
- c. A colorful drawing of your phrase
- d. your name on the front bottom right
