

1. Which of the following is NOT a layer of the OSI Model?

- A. Physical
- B. Transfer
- C. Presentation
- D. Data Link

Answer: _____

2. Which group was responsible for developing the OSI Model?

- A. RSA
- B. FBI
- C. ISO
- D. CIA

Answer: _____

3. Which layer defines the electrical and physical specifications for devices?

- A. Transfer
- B. Network
- C. Physical
- D. Presentation

Answer: _____

4. The _____ layer provides the functional and procedural means to transfer data between network entities and to detect and possibly correct errors that may occur in the _____ layer.

- A. data link/physical
- B. network/transfer
- C. physical/presentation
- D. session/transport

Answer: _____

5. Which layer provides the functional and procedural means of transferring data from a source to a destination via one or more networks?

- A. Transfer
- B. Application
- C. Session
- D. Network

Answer: _____

6. Which layer provides transparent data transfer between end users?

- A. Transport
- B. Transfer
- C. Session
- D. Application

Answer: _____

7. Which layer controls the connections between computers?

- A. Transport
- B. Session
- C. Physical
- D. Data Link

Answer: _____

8. Which layer is responsible for data representation, encryption, and decryption?

- A. Physical
- B. Data Link
- C. Transport
- D. Presentation

Answer: _____

9. Which layer is responsible for identifying communication partners and determining resource availability?

- A. Session
- B. Application
- C. Network
- D. Transfer

Answer: _____
