

Cybersecurity Guided Notes

Lesson 2.8.8 - Cryptography Limitations

1. What limitations remain constant regardless of when and what technology is used?
2. What are some important questions to ask when considering the longevity of cryptographic keys?
3. What cybersecurity concern can arise if you are so infatuated with a sports team that every key you use/generate involves that team?
4. What could happen if keys were reused?
5. If the cryptographic key is too complicated, what issues will you face?
