

## Intro to Linux Guided Notes

# Lesson 1.2.3 - Metadata

Name: \_\_\_\_\_ Class: \_\_\_\_\_ Date: \_\_\_\_\_

1. What is metadata, and why is it important in the digital world?
2. Provide examples of metadata in different contexts.
3. How does metadata contribute to efficient searching in a library catalog?
4. What does the stat command do?
5. How does the file command contribute to file type determination in Linux?
